

Australia has recorded 12 times more Deaths in 10 months due to the Covid-19 Vaccines than Deaths due to all other Vaccines combined in 51 years

BY [THE EXPOSÉ](#) ON [JANUARY 11, 2022](#) • ([17 COMMENTS](#))

Data published by Australia's Medicine Regulator confirms that there have been twelve times as many deaths reported as adverse reactions to the Covid-19 vaccines over a period of just ten months than deaths reported as adverse reactions to every other available vaccine combined over a period of 51 years.

The Department of Health Therapeutic Goods Administration (TGA) is the medicine regulator for the Australian Government, and as part of the Department of Health, the TGA

regulates the quality, supply, and advertising of medicines, pathology devices, medical devices, blood products and most other therapeutics.

However, a [Freedom of Information request](#) made by Doctors for Covid Ethics back in February 2021 revealed that the TGA never saw the extremely limited study data for the Pfizer mRNA Covid-19 vaccine prior to granting it emergency approval and deeming it safe to be injected into the arms of Australians.

13. On 21 May 2021, the TGA responded to your email. In relation to your first query, the TGA explained:

*“...whilst you were previously informed that the scope of the request may have been too voluminous, we have taken considerable extra time to reflect on the precise terms of your request. Your email of 29 April 2021 also assisted in clarifying and narrowing the scope of your request. Accordingly, particularly having regard to the objects of the FOI Act, and to the context of your request (including the extraordinary impact of COVID19 across the world), on this occasion, the decision-maker decided to progress your request for documents. Notwithstanding that processing such a request may ordinarily have been considered too voluminous, given the size of the one document (1,145 pages) falling within the scope of your request. In relation to your second query, the TGA now understands that you are seeking documents that confirm whether the TGA requested Individual Level Patient Data following the sponsor’s application to the TGA for the provisional registration of its vaccine. The TGA confirms that **we do not hold Individual Level Patient Data in relation to this application for provisional registration.**”*

The TGA originally attempted to suppress the FOI request by requesting a 6-month extension in view of the amount of work required to respond satisfactorily. But after a complaint was made to the Office of the Information Commissioner the TGA responded confirming that they had never seen or requested the patient data from Pfizer and simply accepted Pfizer’s report of their study as fact, despite their proven [history of fraudulent claims](#).

Pharmaceutical giant Pfizer Inc., have been fined at least £3,573,465,793.97p since the year 2000 for over 80 offences / violations.

This includes over £26.1million in Kickbacks and Bribery offences, £870million in False Claims offences and £2.5billion in healthcare related offences.

Top 5 Offense Groups (Groups Defined)	Penalty Total	Number of Records
healthcare-related offenses	\$3,373,675,000	10
government-contracting-related offenses	\$1,161,001,892	23
safety-related offenses	\$104,004,655	10
competition-related offenses	\$98,166,568	8
environment-related offenses	\$5,324,642	23

Top 5 Primary Offense Types	Penalty Total	Number of Records
off-label or unapproved promotion of medical products	\$3,373,675,000	10
False Claims Act and related	\$1,161,001,892	23
drug or medical equipment safety violation	\$103,840,000	5
Foreign Corrupt Practices Act	\$60,216,568	3
kickbacks and bribery	\$34,700,000	3

The TGA's admission that they have never seen the raw trial data for the Pfizer jab prior to granting it approval, and Pfizer's scandalous history of fraudulent claims and bribes, may go some way to explaining why the TGA have so far refused to pull the Covid-19 injections from distribution to the public, despite 8 times more adverse reactions, and 12 times more deaths being reported due to the jabs over a period of 10 months than have been reported to all other available vaccines combined since the 1st January 1971.

The TGA has a '[Database of Adverse Event Notifications](#)' that allows visitors to search adverse event reported for medicines including vaccines. The reports come from a wide range of sources, including members of the public, GPs, other health professionals and the therapeutic goods industry.

By searching the [database](#) for 'Vaccine' and deselecting the four available Covid-19 vaccines, with a date parameter of '1st January 1971 – 27th December 2021' the following results can be found –

➤ **[128 medicines selected](#)** between 01/01/1971 - 27/12/2021.

Search results

The results are shown in two tabs.

Number of reports (cases): **19545**

Number of cases with a single suspected medicine: **12638**

Number of cases where death was a reported outcome: **62**

Over those 51 years there have been 128 different vaccines available to the Australian public (excluding Covid-19 vaccines), and there have been 19,545 individual reports to all 128 vaccines combined, including 62 deaths. The TGA state that they think there is a possibility that the available vaccines caused 12,638 of those reported adverse reactions.

By carrying out a new search on the [database](#) for 'Covid-19 Vaccine', with a date parameter of '1st January 2021 – 27th November 2021' the following results can be found –

➤ **[4 medicines selected](#)** between 01/01/2021 - 27/12/2021.

Selected medicines

Trade name	Active ingredients
COMIRNATY COVID-19 vaccine	tozinameran
COVID-19 Vaccine (TNS)	COVID-19 Vaccine (Type not specified)
COVID-19 Vaccine AstraZeneca	ChAdOx1-S (Viral vector)
Spikevax COVID-19 vaccine	Elasomeran (mRNA)

Search results

The results are shown in two tabs.

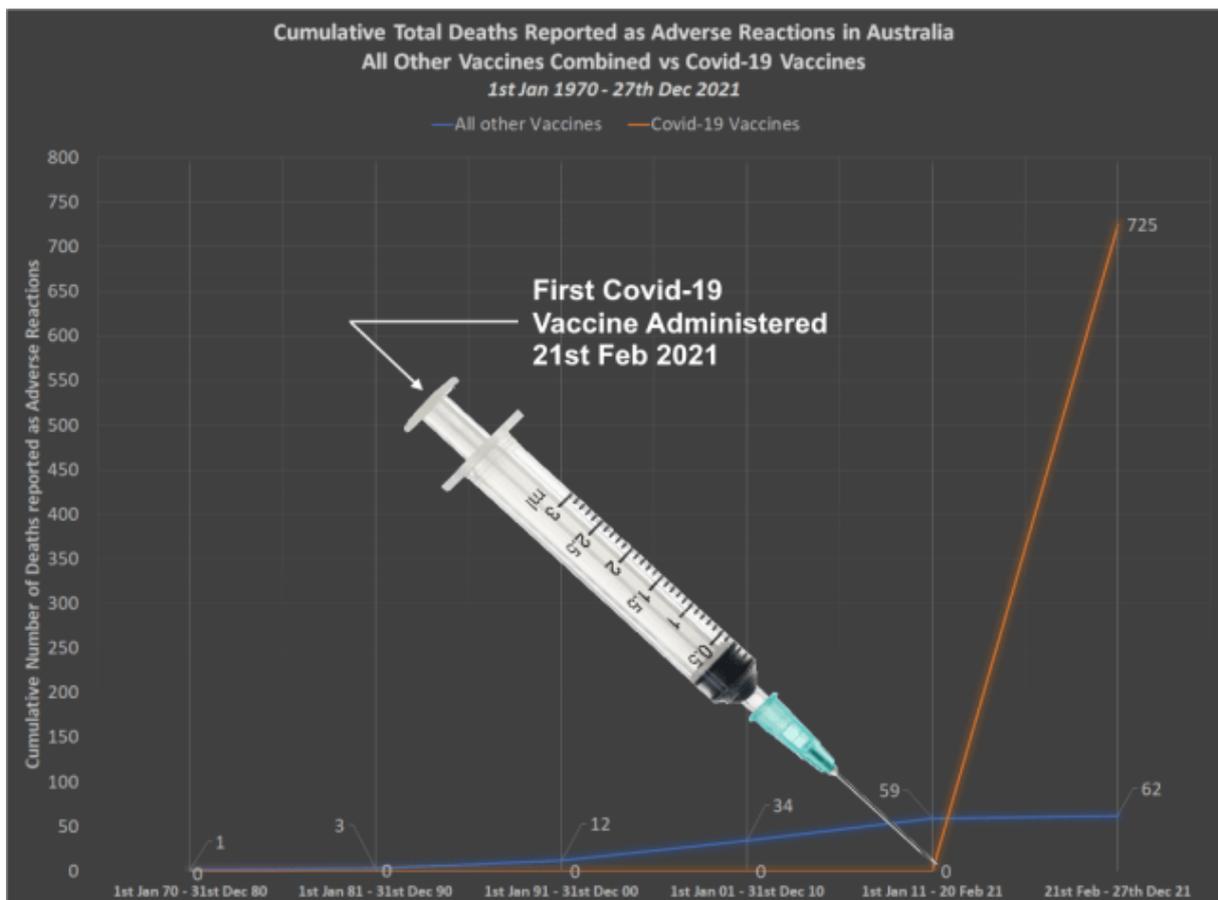

Number of reports (cases): **98017**

Number of cases with a single suspected medicine: **96250**

Number of cases where death was a reported outcome: **725**

The results shows that there have been 98,017 reports made against the available Covid-19 vaccines, including 725 deaths. The TGA state that they they think there is a possibility that the Covid-19 vaccines caused 96,250 of those reported adverse reactions.

The first Covid-19 vaccine was administered in Australia on February 21st 2021. This means that there have been been 12 times more deaths, 5 times more reports of adverse reactions, and 8 times more reports of adverse reactions that the TGA suspects were more than likely due to the Covid-19 vaccines, than have been reported to all other available vaccines combined over a period of 51 years.

According to the TGA database, the leading cause of death due to the Covid-19 vaccines has been an ‘adverse event following immunisation’. The second leading cause of death has been dyspnoea (difficulty breathing), followed by pulmonary embolism (blocked blood vessel in the lung), then cardiac arrest, and then cerebrovascular accident (stroke).

MedDRA system organ class	MedDRA reaction term Click on a term below to search the MedlinePlus medical dictionary.	Number of cases	Number of cases with a single suspected medicine	Number of cases where death was a reported outcome
Injury, poisoning and procedural complications	Adverse event following immunisation	419	410	149
Respiratory, thoracic and mediastinal disorders	Dyspnoea	7009	6824	69
Respiratory, thoracic and mediastinal disorders	Pulmonary embolism	1362	1303	60
Cardiac disorders	Cardiac arrest	107	101	57
Nervous system disorders	Cerebrovascular accident	402	384	52

But the leading causes of death since 1971 due to all other available vaccines combined differ spectacularly. According to the TGA database the leading cause of death due to all other vaccines combined since 1971 has been pyrexia which is a raised body temperature/fever. The next two leading causes of death have been vaccination failure and influenza, followed by seizure, and then vaccination error.

MedDRA system organ class	MedDRA reaction term Click on a term below to search the MedlinePlus medical dictionary.	Number of cases	Number of cases with a single suspected medicine	Number of cases where death was a reported outcome
General disorders and administration site conditions	Pyrexia	3697	2062	7
General disorders and administration site conditions	Vaccination failure	369	341	6
Infections and infestations	Influenza	50	46	6
Nervous system disorders	Seizure	449	197	5
Injury, poisoning and procedural complications	Vaccination error	344	259	5

This data raises serious questions as to why the Covid-19 vaccines have not been pulled from distribution to the public when just four separate vaccines for Covid-19 have caused over 12 times as many deaths in just 10 months, than 128 separate vaccines combined have caused over a period of 51 years.
